SMT-SQJ-30		Manual edge cutting machine is a simply a table or pillars saw for cutting stone slabs. The head can be powered to 45 degrees. The table top moves by hand wheel. But can be easily made power and automatic. Max cutting length 2800mm. Max cutting width 1200mm Motor Power 15 KW Overall weight 3100KG Guide way Hermetical Steel Rail overall size 5000 length 2260 width 2100 height	MANUAL SQJ-30 ELECTRIC POWERED BED
QHW-400		Infrared Bridge Saw is provided with fully automatic girder displacement positioning, and is controlled by microcomputer for fully automatic operation. It has a LCD touch screen for easy operator interface. The working table can tilt at 85 degrees to load slabs and rotates 90 degrees (or 360 degrees) automatically. The machine frame is constructed from cast iron and the main beam has been machined to perfect tolerance to give it extremely straight cuts. All important electric parts come from the world-famous manufacturers and this will ensure the machine stable performance, good adaptability, high precision & high reliability. This machine has been CE certified.	QHW-400
